

Budget Starter Pack - Printable Planner

Made with AI assistance, reviewed by a human. Not financial advice.

How to use this planner

1. Write your monthly income on page 2.
2. List every bill and spending category with a planned amount.
3. Track spending on page 3 through the month (or use the Excel/Sheets tracker).
4. At month end compare planned vs actual on page 4 and adjust.

A simple starting rule (adjust to your life): about 50% needs, 30% wants, 20% savings/debt.

Tips: budget for irregular costs (gifts, car repairs) by setting aside a small amount monthly; review weekly for 10 minutes; start with one month and keep it simple.
